

# Tip Of The Week

---

**September 20, 2010**

## Trend...Your Friend in the End

Routine baseline and testing of assets when nothing is broken can seem wasteful and time consuming. However, when you least expect it, and without the software displaying an alarm, observing a change in the trend can be the difference between routine repair and catastrophic replacement.

To view a case study where observing and investigating a change in a trend prevented major production losses go to [http://www.pdma.com/webinars/Pump\\_Case\\_Study/Pump\\_Case\\_Study.html](http://www.pdma.com/webinars/Pump_Case_Study/Pump_Case_Study.html).

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or [lou@pdma.com](mailto:lou@pdma.com).
