

# Tip Of The Week

---

July 16, 2012

## Software Changes

In the heavy technological and digital framework that we are surrounded in today, we find software applications driving a major part of the advancement in many different industries worldwide. Due to the constant change in database structure, operating systems, and computing power, and the effort corporations must use to maintain a superior product, software is constantly being enhanced, tweaked, and fixed. CHANGE! As a user, with test equipment relying on software to operate, it is a wise practice to ensure your test equipment software is up to date with the latest product updates.

PdMA has recently released the newest version of MCEGold. MCEGold 2.5.1 SP1 adds new icons on the toolbar and throughout the application. Additional enhancements are: Windows 7 64-bit compatibility, EMAX Auto Pre-Save Data Validation, the ability to Print and Export WatchLists, and more. The MCEGold 2.5.1 SP1 software for your PdMA tester can be downloaded by clicking on the link below and following the instructions.
