

A Leader in Electric Motor Testing

Tip Of The Week

November 16, 2015

Help Is Just A Click Away

Need a refresher on Fault Zone Analysis? Trying to track down a rotor anomaly and can't remember one of the six rotor analysis methods (see November 2009 tips) recommended by PdMA? Considering attending a training course (<http://www.pdma.com/PdMA-training.php>) on electric motor testing and analysis? If you answered yes to any of these questions the PdMA website (<http://www.pdma.com>) is a literary gold mine full of information nuggets. Application Notes (<http://www.pdma.com/PdMA-application-notes.php>) related to special application motors, Case Studies (<http://www.pdma.com/PdMA-case-study.php>), and Success Stories (http://www.pdma.com/PdMA_success_stories.php) from fellow reliability professionals, articles ranging from motor testing to asset management, and, of course, access to many years of historical Tips (http://www.pdma.com/2015_PdMA-tip-week.php) on subjects that you and your fellow MCEMAX® users have influenced over the years. And for those of you more video inclined there is a link to the new PdMA YouTube Channel (<https://www.youtube.com/channel/UC-cUONWaudkKReNwC0PPXMQ>) full of educational videos on motor testing topics. Finally, if you are contacting PdMA directly for Technical Support (<http://www.pdma.com/PdMA-tech-support.php>) like help in analyzing your MCEMAX data, you don't need to remember your credit card, but you do need to have your MCEMAX tester ID handy before you call to expedite the support process for you.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
