

A Leader in Electric Motor Testing

# Tip Of The Week

---

January 11, 2016

## Get Started Right in 2016

Looking for a great motor reliability New Year's resolution for 2016? Resolve to capture a motor start sometime this year for every critical motor at your facility. In-Rush amplitudes and Start-Up times are two critical elements of capturing a motor start. These two pieces of data, properly stored and analyzed, will provide key troubleshooting resources for power quality, power circuit, stator, rotor, and mechanical shaft line components.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA<sup>®</sup> mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or [lou@pdma.com](mailto:lou@pdma.com).
