

A Leader in Electric Motor Testing

Tip Of The Week

December 12, 2016

Looking Ahead to 2017

PdMA would like to thank you for following our Tip of the Week. A special thank you goes out to many of you who have provided us with tip material and we look forward to many more years of your great ideas and suggestions.

For the final Tip of the Week in 2016 we wanted to send you into the holiday season thinking about 2017. If the new year will be a year for economic recovery make sure your reliability program, your facility, and your company are prepared to support the production increase. Review the asset health reports of your critical equipment and make sure you won't be in an unplanned shutdown when production needs you most. Ask your reliability team to review the immediate actions to troubleshoot an unplanned failure of your critical equipment. If you don't have immediate actions now is the time to make them. Make sure your reliability technicians and analysts are equipped with the proper tools and training to maximize your uptime and reliability. Consider a reliability certification like CMRP, CMRT, or CRL for your reliability staff to increase their knowledge, confidence and most importantly their buy in to your reliability agenda.

With so much work ahead of us remember to enjoy any time off with your friends and family.

For more information on certification opportunities visit: <http://www.smrp.org/i4a/pages/index.cfm?pageid=3578>
