

A Leader in Electric Motor Testing

Tip Of The Week

June 13, 2016

Justification Series Tip #7 - Deep Water

Isn't it amazing how easily water finds a way into our electrical systems. Sometimes the search for the water takes us deeper than expected. Regardless of how deep we have to look to find the water, it is important to recognize when we have water intrusion and get ahead of it before it causes extensive damage to our electrical systems. Or worse, the possibility of unplanned outages and lost production. To see a case study on troubleshooting and isolating water intrusion resulting in the prevention of lost production visit the PdMA YouTube channel at <https://www.youtube.com/watch?v=9SG3INm8u8w>

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
