

## Web-Based Training is Now Available

PdMA Corporation, The Leader In Electric Motor Testing, is proud to announce the release of their web-based training "Fundamentals of MCEMAX®". This course has been specifically designed to benefit new users of the technology as well as giving our seasoned users an excellent refresher. Here is a sample of the many benefits you can expect from our web-based training.

- ✓ **No Travel Necessary, Your Safety Comes First** – Travel can be difficult, costly, and time consuming.
- ✓ **You Control the Pace of the Course** – Some concepts may be difficult to master. Web-based training allows you the time and opportunity to thoroughly comprehend the material that is being delivered.
- ✓ **Flexibility** – Learn from the comfort of your own home, office, or local café. Only an internet connection is required.
- ✓ **Consistency** – Web-based training modules deliver identical course content every time to each person. This eliminates the various emphasis and course content influence when using different instructors.
- ✓ **Comprehensive Testing** – We deliver 16 modules that take you from start to finish on the operation of an MCEMAX. To ensure you are absorbing the material, each module contains knowledge check questions as well as a 10 question quiz after each section.

If you are looking to train your whole team or a newly hired employee, contact us and we will give you a plan that works best for you. Don't wait another second. Contact PdMA today for a course syllabus and pricing!
