

A Leader in Electric Motor Testing

Tip Of The Week

April 18, 2016

Tested...Unassigned?

What is worse than not knowing the condition of your electric motor? Not knowing the condition of your electric motor after you have tested it. Make sure you visit your electrical reliability dashboard (Site Condition for our MCEGold® users) to verify that motors being tested are actually being analyzed and given a condition code for appropriate action to be taken.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
