

A Leader in Electric Motor Testing

Tip Of The Week

June 12, 2017

Centralized Data Analytics

Given the resource limitations so many facilities face today it is becoming increasingly difficult to get data analyzed correctly by the right person at the right time. The right person is the dwindling population of experienced analyst who knows the system and the data sufficiently to make the right call. The right time is before the issue becomes severe or even catastrophic. One solution many are moving to is PdMA Cloud Services. Rather than multiple islands of data to be independently analyzed from behind the heavily guarded corporate servers, the cloud allows maintenance data to be centralized in one external secure location for easy access from the right person...at any time...from any place. With easy access to centralized data the top analyst from any of your facilities can easily give their assessment, and sites can even extend a secure read only invitation to the local motor repair shop experts for their assessment of the data. For more information on PdMA Cloud Services for your electric motor reliability needs visit our website at www.pdma.com.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
