An Award Winning Program

Congratulations to Westar Energy for winning the 2012 Uptime Magazine Best Maintenance Reliability Program. Uptime Magazine's awards recognize organizations that demonstrate excellence in managing equipment reliability using advanced strategies and high tech sensing technologies to determine the early onset of a potential failure.

Westar Energy is an electric utility providing service to customers in east and east central Kansas. In 2001 they began the process toward reliability. To reach their reliability goal the company uses a variety of tools including four PdMA MCEMAX motor circuit testers. We are proud to be a part of Westar Energy's success.

You can read about West Energy's award and the company at:
