

Tip Of The Week

April 4, 2011

Measure, Manage, Improve

When evaluating your plant, measurements should not only expose strengths. Natural tendency causes us to want to look good, but if you do not discover your weaknesses a false sense of security can lead to catastrophic failure. Verify your performance measurements are up to date, benchmark against the best companies to help minimize the tendency to use measures that only make you look good, and set high standards. Only then can weaknesses be converted to strengths. Measure, manage, and improve.
