

A Leader in Electric Motor Testing

# Tip Of The Week

---

May 23, 2016

## Less-to-Best Practices

According to best practices, 50% of the maintenance performed at your facility should use predictive techniques while the other 50% of maintenance is spread among preventive and reactive techniques. Many facilities today are operating at less than best practice with only 15% of their maintenance being predictive. Where does your facility fit in the less-to-best practice curve? If you are not already at, or on your way, to 50% predictive then maybe it is time to get an update on your knowledge of predictive maintenance strategies at one of the popular reliability conferences. To see a list of preferred upcoming reliability conferences in 2016 visit our website at <http://www.pdma.com/PdMA-events.php>

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or [lou@pdma.com](mailto:lou@pdma.com).
