Setting Up Testing Routes

Did you know that MCEGold® allows you to establish multiple routes for fast, convenient testing? Our WatchList module in MCEGold is an excellent tool for developing any number of routes. For example, if you want to set up a weekly route for your technicians, you can do it. Let's say you want to set up a route for a specific building, you can do that too. You can even have the same asset in multiple WatchLists and place them in order of criticality. The benefits are endless, just like the number of routes you can set up.

For more information check out our tutorial on the MCEGold WatchList at: <http://www.pdma.com/PdMA-tutorials.php> .

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 126 or lou@pdma.com.
