## Data Mining? Try a Detailed Search

The MCEGold software provides basic and advanced search options. The basic search finds a specific asset name or ID, but advanced search is an extensive program that searches the entire database to locate a specific motor(s) or type of motor(s) using the nameplate information and historical data. The results of the search can be individually or globally selected for data mining and analysis, reporting, or WatchList development. For details on advanced search capabilities read: [http://www.pdma.com/pdfs/appnotes/0401-Advanced\\_Search.pdf](http://www.pdma.com/pdfs/appnotes/0401-Advanced_Search.pdf)

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 166 or [lou@pdma.com](mailto:lou@pdma.com).
