

A Leader in Electric Motor Testing

Tip Of The Week

August 17, 2020

No Travel Does Not Mean No Training!

With the various pandemic travel guidelines many reliability professionals have been unable or have chosen not to travel. This puts a limitation on planned or scheduled training events which may be critical to skills development in utilizing technology or techniques. If you have been limited in your professional development, make sure you ask your technology provider for online web-based training opportunities. Like many of our schools around the world, companies are now offering alternatives to their customers for continued education in this difficult to travel environment. PdMA is also entering the online web-based training industry to ensure our new and existing customers continue to have access to the critical training necessary to utilize and maximize their reliability skill set. Whether you are just getting started using technology like the MCEMAX® or looking for a refresher course to re-visit a specific application or process, online web-based training can offer what you need. Additionally, for those who find it difficult to give up a week of work to attend a training class, online web-based training courses allow a self-paced approach to completing a course and performing skills verification.

To find out more about PdMA's online web-based training opportunities visit our website at:
<https://www.pdma.com/PdMA-training.php>.

You are invited to submit an Electric Motor Testing Tip of your own and receive a free PdMA® mug or hat if we publish it! Contact Lou at 813-621-6463 ext. 166 or lou@pdma.com.
